

Notes from Bernstein Bibliography meeting 27th November (by Clare Llewellyn, Rob Sanderson)

In attendance: Victor Karnaukhov, Clare Llewellyn, Mathias Manecke, Rob Sanderson, Walter Schinnerl, Frieder Schmidt, Emanuel Wenger

General

- * Add utf-8 encoding to content-type header (IE doesn't respect <?xml header)
- * document type to be added by DNB, icon to be added to display per type
- * masking, phrases, truncation
- * Put query into results page

Sorting

- * by title
- * by author -- key in data, need to resolve
- * by year of publication
- * default: author then date
- * sort by title without a/an/the (article) (has a field in data) but display full title

Save records into sets

- * checkbox next to number (mass manage)
- * manage sets (create, rename, delete, add to set, remove from set)
- * download sets, email sets
- ** synchronize users between workspace and dnb... talk to Walter

Browse

- * by normalised title
- * by language specific terms (for example: German subject)

Display

- * Add in all classification levels to display

For example:

- 8. Watermarks
- 8.1 Some sort of watermark
- 8.1.6 Something below some sort of watermark

- * Flags for language ala Walter's stuff - If not available then display in English, if not then display in German
- * Add in Bernstein template once template is finalised
- * Vienna to provide templates for style, and standard formats for things such as about and help.
- * Allow for templating of text in pages for example translations of labels
- * Take out author also referred to from summary display
- * Display record as will be defined by Mathias (merging fields and so on)
